

Manvi Mittal

Full Stack Software Engineer

Saharanpur, Uttar Pradesh, India | +91 9317942591 | manviamittal7@gmail.com
[linkedin.com/in/mittalmanvi](https://www.linkedin.com/in/mittalmanvi) | github.com/mittalmanvi27-cpu | ramaya-ten.vercel.app

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1+ year of experience building production web applications and REST APIs using React (Next.js), TypeScript, JavaScript, Node.js, Java, and SQL. Shipped calibration monitoring and digital inspection platforms that cut missed schedules by 60 percent and processing time by 55 percent through API driven automation. Built and deployed responsive web applications end to end on Vercel, from UI to backend integration to deployment. Strong foundation in data structures, algorithms, REST API design, relational databases, and distributed systems, with a focus on developer experience, performance, and maintainable code.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML5, CSS3

Frontend: React, React Spectrum, Next.js, Tailwind CSS, responsive and accessible web design, component-based UI development

Backend and APIs: Node.js, Express.js, REST API design, building and consuming REST APIs, API integration, authentication, Gemini API

Databases: MySQL, schema design, query optimization, indexing and querying

Cloud and Deployment: Microsoft Azure, Docker (containerization), Vercel (serverless deployment), CI/CD (Git based continuous deployment on Vercel), Google Cloud fundamentals, Git, GitHub, modern deployment practices

Engineering Practices: Agile, Scrum, code review, unit testing, debugging, production issue investigation, monitoring dashboards, technical documentation, command line tools (Git CLI, npm)

Computer Science Fundamentals: Data Structures, Algorithms, Object Oriented Programming, System Design, Distributed Systems

PROFESSIONAL EXPERIENCE

Software Engineer | Ezentech India Pvt. Ltd. | Saharanpur, India

September 2025 to Present

- Designed, developed, and shipped a calibration monitoring web application with automated system generated alerts, cutting missed calibration schedules by 60 percent across tracked equipment.
- Replaced manual spreadsheet tracking with REST API driven services, improving record accuracy by 40 percent and lowering end to end processing time by 55 percent.
- Built a digital inspection system that replaced paper based quality checks, standardizing data capture across inspection points and removing manual data entry.
- Developed real time dashboards with automated notifications, shortening average issue resolution time for operations teams.
- Participated in code reviews, debugging, and production issue resolution across frontend and backend, writing tests and documentation for shipped features.

Software Engineer | Cloud Infotech | India

June 2025 to August 2025

- Implemented and tested features across distributed storage, indexing, and querying components, improving query response time.
- Translated ambiguous problem statements into scoped technical designs, extending existing services and optimizing query handling paths.
- Collaborated with cross functional product and engineering teams in two week Agile sprints, shipping reviewed and tested code each cycle.

PROJECTS

Ramaya Grand, Luxury Venue and Events Website | Next.js, React, TypeScript, Vercel | [Live](#) | [GitHub](#)

- Built and deployed a responsive multi page website (venues, events, gastronomy, blogs, contact) for a luxury celebration brand using Next.js, React, and TypeScript, owned end to end from UI to deployment.
- Implemented an event inquiry form, hero video, and image galleries with a mobile friendly layout; set up continuous deployment on Vercel from GitHub.

AI Chatbot | Next.js, TypeScript, Gemini API, REST APIs | [GitHub](#)

- Built a full stack AI chatbot that integrates the Google Gemini API through REST API calls to generate conversational responses, with a React based chat interface.
- Handled request and response flow, error handling, and API key management for the third party API integration.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2021 to 2025

Chitkara University, Himachal Pradesh, India

Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object Oriented Programming.

Senior Secondary and High School | Ram Krishna Mehta Inter College | 2018 to 2021

CERTIFICATIONS AND TRAINING

- JavaScript (April 2023); Software Engineering (February 2023); Database Management Systems (September 2022)
- Introduction to Cybersecurity (April 2023); Introduction to Blockchain Technologies (January 2023)
- Web Developer Intern, Bharat Intern; Student Trainee, Google Cloud (cloud fundamentals training)
